ONSET OF THE AGRICULTURAL SEASON: MONITORING AND OUTLOOK BULLETIN

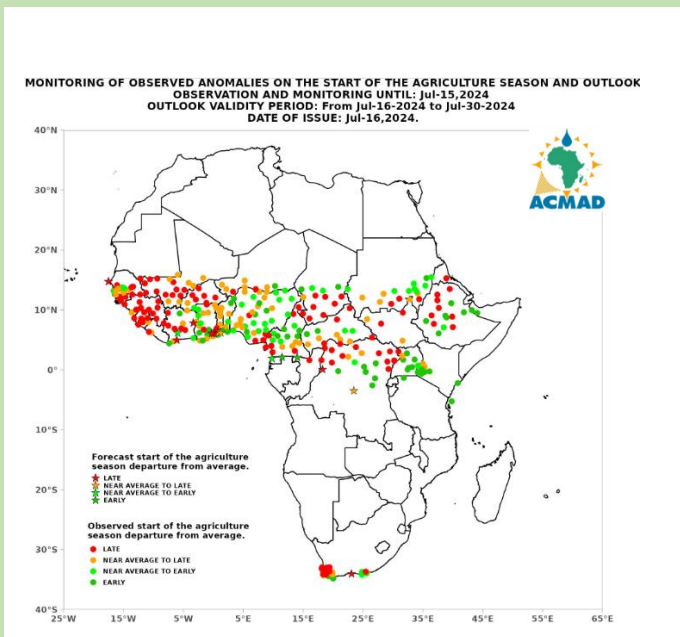

Observed Status: *as of July 16, 2024*

In general, the agricultural onset has now effectively started over most of the Sudano-Sahelian band of Africa. A late onset has been reported in most parts of Niger, Burkina Faso, Mali, Senegal and Guinea.

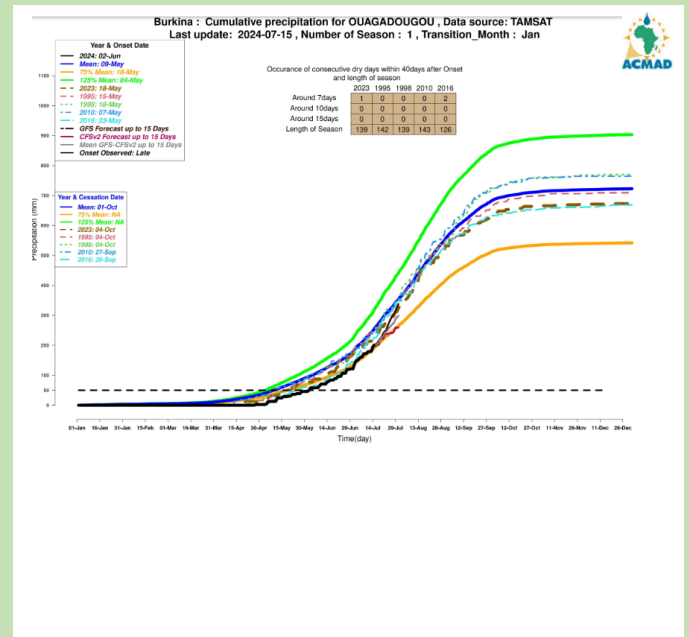

In the profile below the Agricultural onset in Ouagadougou, Burkina Faso started with more than 23 days of delay.

Outlook: *until July 30, 2024*

The Gulf of Guinea countries are currently experiencing the short dry season commonly called August break.

Characteristic of the Onset of the Agricultural Season over Africa (16-30 July 2024)
